Built-in aluminum heat sink for optimum temperature
- **Noise cancelling mic**
Active noise cancellation microphone filters out unwanted noise signal for clear messages to team
- **Flexible Mic arm**
Microphone arm can bend in any direction for personalized usage
- Cable length 2.5M
Braided Cable with Gold-plated USB plug and cable tie

HEPHAESTUS

Multi-sensorial Gaming Headset

A cooling structure with built-in aluminum heat sinks would drop the temperature to hit that optimal comfort level we all desire in an all-day gaming session.

Additionally, the blast source identifier triggers the ear cups to vibrate independently depending on the direction of the sound. You no longer merely have the surround sound to assist you in a frantic warzone, but an actual vibration to pinpoint where your enemies are located. Misjudgment is undeniably a thing of the past with HEPHAESTUS at your disposal.

GHS2000

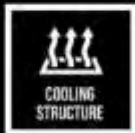

EROS ELITE

GAMDIAS EQ Gaming Headset

Switch audio modes between Surround Sound, First Person Shooter and Bass-Boost via the in-line remote.

Professionally tuned acoustic simulator allows gamers to select their favorite acoustic environment while the exclusive EOS-controlled voice changer provides easy and fun voice tuning and modification.

With the EROS Elite EQ, gamers can level-up in comfort and style!
